COMPLETE BUILD RECORD & REPRODUCTION GUIDE

LOOP

A self-improvement system, grown not generated

Every step, every failure, every removed bit. How the system was actually built: the staged build order, the gate that survived 99 accepted mutations, the two database rollbacks, and the decisions that killed the alternatives — compiled from the repository's own primary sources.

1,317 tracked files · 352 commits · 99 accepted mutations

Repository craighckby-stack/V1 · derived at commit 292b2a0

October 24–29, 2026 · compiled with Z.ai Code
